

Oracle's Primavera P6 EPPM Team Member

INTRODUCTION

The Oracle's Primavera P6 Team Member interfaces are designed for team members to record status from any location using a simple interface. Options include an iPad/iPhone application, Android application, a separate PrimaveraP6 Team Member Web interface, and email statusing. These options provide quick, convenient, and easy access to assigned tasks using the platform or device that best suits your line of work such as resources in the field, field supervisors, and other resource

OVERVIEW

Accurate project status is critical to the success of any project and capturing the information directly from the people doing the work is the best way to ensure your schedule reflects the true progress.

- ▶ Easily update tasks
- ▶ Capture progress via a timesheet interface
- ▶ View and update steps, Codes, notebooks and User defined fields
- ▶ View predecessor and successor tasks, documents
- ▶ Easily filter the task list by timeframe or simple search
- ▶ Quick, convenient and easy access for Team Members to status their work
- ▶ View only the work assigned to you
- ▶ Review and approval of updates to ensure project integrity
- ▶ Update tasks offline when no internet connection is available using the iPad/iPhone app

FEATURES & BENEFITS

▶ Email Statusing

Email statusing enables users to: Request a filtered list of your current tasks through email or receive an email from the project manager.

Update tasks by simply replying and making status updates within the email

▶ Project Management anytime, anywhere

A flexible web-based user interface gives the project team the ability to access project information from any device. Team Member interfaces include iPad iPhone application, Android application, a separate Primavera P6 Team Member Web interface (optimised to run on a tablet) and an email statusing option so that team members can quickly and easily update statuses.

▶ Improve collaboration in your Projects

Facilitate team-based collaboration to improve decision making, streamline coordination and improve efficiency within your project team

Unite project teams and stakeholders with a host of collaboration and feedback capabilities.

▶ Project Controls

Primavera P6 provides the ability to determine what fields are updated with the Team Member interfaces.

It also provides the capability to stage updates for approvals and track all update history for easy reference

▶ Easy Configuration options

Flexible project configuration options are available to determine which fields are visible to team members for updating. These option not only ensure that there is the right level of control, but promote simple adoption of enterprise project portfolio best practices.

▶ Approval Process

As team members provide status updates the projects control group need an efficient way to manage and review these updates as well as collaborate with project team members

All pending updates can be viewed with the ability to make decisions to approve, hold updates for clarification or override data. This allows visibility of all updates and ensured the integrity of the schedule

▶ History of Changes

The projects controls group can monitor the history of Team Member updates including who submitted the change, when it was submitted, who approved it, when it was approved as well as the data that was updated. This allows the control group to increase project success rate and improve schedule integrity by analysing change history and proactively troubleshooting discrepancies

▶ Track progress and gain insights

Timely and accurate project information to identify potential problems faster. Track, capture and analyse the time team members spend on project-based work by providing them with their tasks automatically populated with their own assignments across all projects.

▶ Secure system

The powerful security features on Primavera EPPM protects your data from unauthorised changes and only allows users with appropriate permissions to access project related information.
