Primavera P6 Release 7 (Client)

Course 102: Project Management in Primavera P6

This course provides hands-on training for Primavera's client/server based solution. Participants will gain a thorough background in the concepts of planning and scheduling. Scheduling techniques will be covered. This three-day course leads you through hands-on workshops that create and track an entire project to completion. All workshops and instruction use the three basic elements of project management: schedule, resource and costs.

Prerequisites: Knowledge of project management principles and a working knowledge of MS Windows (TM)

Duration: 3 Days

Targeted role: Program Managers, Project Managers, End Users, Business Analysts, Functional Implementers

Course 106A: Administration in Primavera P6 and P6 Web Access

Learn to use Primavera P6 to complete a wide variety of administrative functions, including how to create users who will access the application and assign their security privileges. You will also learn how to create enterprise data, such as project codes, cost accounts, and financial periods. The course also covers administration topics in Web Access, including User Interface views and calculated user-defined fields.

Prerequisite: Project Management in Primavera P6 and in Primavera P6 Web Access.

Duration: 1 Day

Targeted role: Program Managers, Project Managers, End Users, Business Analysts, Functional Implementers

Course 106P: Advanced Project Management in Primavera P6

This course provides in-depth project management training in Oracle's Primavera P6. Detailed instruction on earned value analysis includes lessons on duration types and how to calculate percentage complete. Students will also learn to leverage best practices to create a project using methodologies.

Prerequisite: Knowledge of project management principles and a working knowledge of MS Windows (TM)

Duration: 2 days

Targeted role: Program Managers, Project Managers, End Users, Business Analysts, Functional Implementers

Course 106R: Resource Management in Primavera P6

This course provides in-depth project management training in Oracle's Primavera P6. The course covers advanced topics in managing resource allocation, future-period bucket planning, and resource levelling. Extended case studies at the end of each day provide an opportunity to apply new skills and functionality. You will first assign resources and analyse their allocation. At the end of the second day, you will apply what you have learned to resolve resource over allocation.

Prerequisite: Basic Project Management knowledge and a working knowledge of MS Windows (TM), completion of 102 Project Management in Primavera P6 course

Duration: 2 days

Targeted role: Program Managers, Project Managers, End Users, Business Analysts, Functional Implementers

Course 108: Migrating from P3 to P6

This course is specifically designed for users moving from Primavera Project Planner (P3) to P6. Numerous charts list how P3 fields and functionality map to Primavera 5.0/6.0, enabling users to leverage their existing knowledge of P3 and rapidly adapt to new features in P6. The course begins with navigation, menus, and terminology in P6, and introduces new ways to view layout and run reports. An appendix at the back of the menu covers how to convert projects from P3 to P6.

Prerequisite: Knowledge of project management principles and a working knowledge of MS Windows (TM), must be existing P3 users (those who wish to learn Primavera P6, but are not P3 users, should register for course 102)

Duration: 2 days

Targeted role: Program managers, project managers, End Users, Business Analysts, and Functional Implementers who are using P3

Primavera P6 Release 7 (Web)

Course 101: Project Management in Primavera P6 Web Access

This course provides hands-on training for Primavera's Web-based solution. Participants will create a project, create activities and relationships, customise activity views, assign resources, adjust the project plan to account for schedule delays and over allocated resources, and analyse portfolios. Participants also will customise dashboards. Hands-on workshops help students create and track an entire project to completion.

Prerequisites: Knowledge of project management principles and a working knowledge of MS Windows (TM)

Duration: 3 Days

Targeted role: Program Managers, Project Managers, End Users, Business Analysts, Functional Implementers

Course 107: Resource Management in Primavera P6 Web Access

This course provides hands-on training for Oracle's Primavera web-based solution, Primavera P6 Web Access, focusing on resource management. Participants are guided through hands-on workshops to add a resource to the enterprise resource pool, planning for resource needs in future projects, staffing resources on current projects, and managing resources to ensure they are fully utilised. A case study provides an opportunity to apply new skills in resolving resource over allocation.

Prerequisite: Basic knowledge of project management principles and a working knowledge of MS Windows (TM), Project Management in Primavera P6 Web Access

Duration: 1 day

Targeted role: Program Managers, Project Managers, End Users, Business Analysts, Functional Implementers

Course 109: Portfolio Management in Primavera P6 Web Access

This course provides hands-on training on managing portfolios in P6 Web. Topics include creating a portfolio, viewing and analysing portfolio performance, creating portfolio views, capacity planning, waterline analysis, and managing issues and risks. A case study at the end of the day reinforces new skills and functionality.

Prerequisite: Knowledge of project management principles and a working knowledge of MS Windows (TM), 101: Project Management in Primavera P6 Web Access course recommended but not required

Duration: 1 day

Targeted role: Portfolio Managers, Project Managers, Executives

Primavera P3

Course 601: Planning and Scheduling with P3

This course covers getting started with P3 through hands-on, basic training. The course leads you through nine hands-on workshops that create and track an entire project to completion, using the three basic elements of project management: schedule, resources, and costs. Scheduling techniques will be covered.

Prerequisite: Knowledge of project management principles and a working knowledge of MS Windows (TM)

Duration: 3 days

Targeted role: Program Managers, Project Managers, End Users, Business Analysts, Functional Implementers

Course 602: Resource & Cost Management with P3

This course provides you with an in-depth view of managing resources and costs using P3 Primavera Project Planners. It examines how to use P3 for resource and cost planning, control, and analysis. This course will enable you to take full advantage of driving resources, resource curves, hierarchical resources, resource profile/tables and resource levelling.

Prerequisite: Knowledge of project management principles and a working knowledge of MS Windows (TM), Completion of 603 planning in P3 course

Duration: 1 day

Targeted role: Program Managers, Project Managers, End Users, Business Analysts, Functional Implementers, Resource Managers, Planners and schedulers.

Course 603: Managing Project Data with P3

This course will take you beyond the fundamentals of scheduling a project in P3 by transferring project data through copy and paste, storing, and retrieving fragnets, and using import and export. In addition, global change, and custom data items will be used to modify activity data. Learn to enhance your presentation by including objects and symbols and post this information on your company intranet using Web Publishing Wizard.

Prerequisite: Knowledge of project management principles and a working knowledge of MS Windows (TM), 601: Planning and Scheduling in P3, 602: Resource and Cost Analysis in P3

Duration: 1 day

Targeted role: Program Managers, Project Managers, End Users, Business Analysts, Functional Implementers, Resource Managers, Planners and schedulers.

Primavera - Other Courses

Course 201: Managing Contracts in Primavera Contract Manager

This course provides hands-on training for Oracle's Primavera Contract Manager Solution, focusing on project cost control and document management. Additional topics include logging and tracking submittals, recording project communication, awarding procurement items, and using contracts, purchase orders, and trends. Numerous workshops reinforce new functionality and skills.

Prerequisite: Knowledge of project management principles and a working knowledge of MS Windows (TM) and Internet Explorer

Duration: 3 days

Targeted role: Program Managers, Project Managers, End Users, Business Analysts, Functional Implementers

Course 700: Managing Projects in Primavera Contractor

This course provides hands-on training for contractors. It examines how to plan, schedule, control, and analyse projects.

Prerequisite: Working knowledge of MS Windows (TM)

Duration: 2 days

Targeted role: Programme Managers, Project Managers, End Users, Business Analysts, Functional Implementers.

PLEASE NOTE: All courses are delivered using standard Oracle University materials - Industry specific offerings/examples are not included in standard materials.
