

Oracle Primavera Cloud Licensing

Primavera Cloud is geared at making the solution more accessible to a wider range of users. This is especially important in today's market where distributed access is becoming more and more prevalent and demanded.

There are four licenses types, designed to meet the needs of your organization. Licenses determine what apps, pages, and mobile apps a user has access to. There are three licencing models, with Named User, Project or Enterprise licensing. Please feel free to contact us at Milestone for further details.

- **Schedule License:** For power schedulers to prioritize, plan, manage, and evaluate projects across your organization.
- **Portfolio Planning License:** For portfolio planners to propose and manage the portfolios across your organization.
- **Progress License:** For users who only need access to their activities and timesheets.
- **Lean License:** For schedulers that use Lean scheduling to manage their projects.

If you have the Named Users license model, you will assign available licenses to users. If you have the Project license model, then users will automatically be entitled to the Schedule license, the Lean license, and the Progress license. If you have the Enterprise license model, then users will automatically be entitled to all four licenses.

Each license gives a user different access to apps, mobile apps, and pages. The tables below highlight which apps and pages come with which licenses. The Portfolio Planning license gives you access to the ideas context and functionality.

Licenses by App
