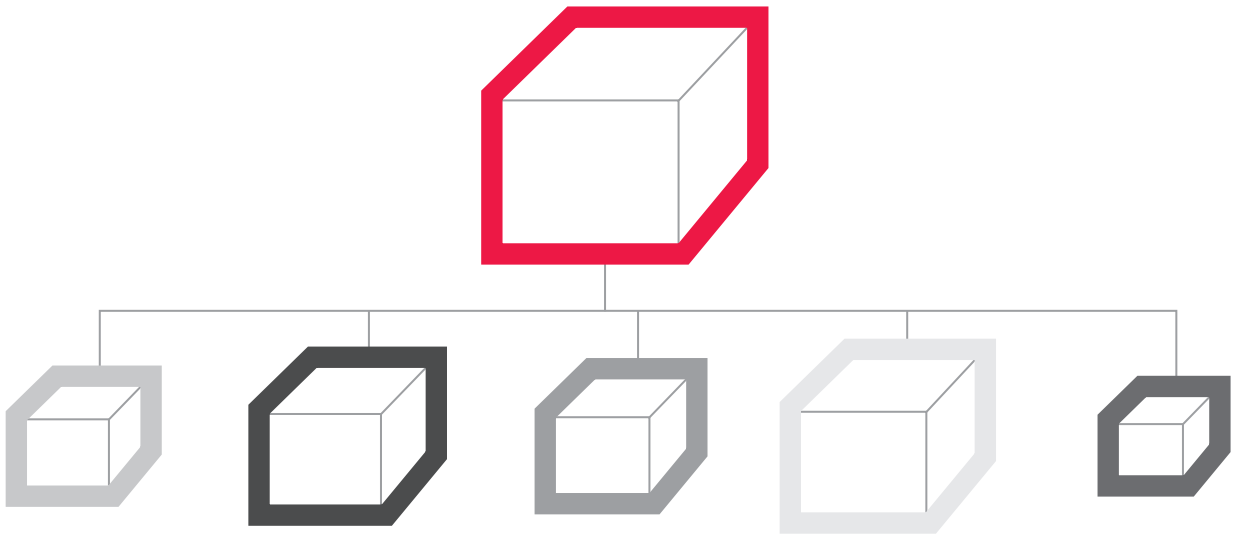
ORACLE PRIMAVERA

Oracle's Primavera P6 Enterprise Project Portfolio Management

Milestone
Project Management Solutions



INTRODUCTION

Oracle's Primavera P6 Enterprise Project Portfolio Management (Primavera P6 EPPM) is the most powerful, robust and easy to use solution for globally prioritising, planning, managing and executing projects, programs and portfolios. Primavera P6 EPPM provides you with a 100% web-based solution for managing projects of all sizes.

ORACLE
PRIMAVERA

OVERVIEW

- Flexible user interface
- Team members interfaces for statusing work
- Streamlined Enterprise reporting
- Integrated risk management
- Resource management and optimisation views
- Workflow engine to automate business processes
- Unites project teams and stakeholders through collaboration and strong feedback methods
- Reduces risk of cost and schedule overruns
- Optimised management of all resources for maximum ROI
- Monitor and visualise performance vs. plan
- Confidently make and keep project commitments

FEATURES & BENEFITS

- **Ensure project delivery success**
  Primavera P6 EPPM includes role-based functionality to match each team member's needs and responsibilities. Providing a real time view of project performance, it equips project teams with the optimum blend of usability, power and flexibility to effectively execute projects.
- **Scalable to all sizes of project and program**
  Primavera P6 EPPM is based on a robust and proven standards-based Java architecture that is designed to deliver high performance with tight security, flexible integration and real-time reporting and analytics.
- **Project Management anytime, anywhere**
  A flexible web-based user interface gives the project team the ability to access project information from any device. Three P6 Team Member interfaces include P6 Team Member for iPhone application, P6 Team Member Web (optimised to run on a tablet) and an email statusing option so that team members can quickly and easily update statuses.
- **Improve collaboration in your organisation**
  Facilitate team-based collaboration to improve decision making, streamline coordination and improve efficiency within your business.
- **Optimise organisational capacity and prioritise projects**
  Primavera P6 EPPM lets project managers manage demand and balance resources across the optimum balance of projects.
- **Communicate with ease**
  Intensive activity Gantt charts allow planners, schedulers and project managers to communicate a more accurate and complete graphical representation of a project's schedule, while calendar and activity network views offer an intuitive view for displaying assignments along with the required information to perform the work.
- **Execute complex projects with ease**
  The 'Planning and Scheduling' module in Primavera P6 EPPM provides multi-user, multi-project functionality and offers scheduling and resource control capabilities and support for multi-tiered project hierarchies, resource scheduling, data capture and customisable views.
- **Match the right people with the right projects**
  The software supports both top-down and bottom-up resource request and staffing processes making it easy for project managers to communicate requirements throughout the project lifecycle and maximise resource usage.
- **Track progress with time sheets to gain insights into costs and resource use**
  Track, capture and analyse the time team members spend on project-based work by providing them with time sheets automatically populated with their own assignments across all projects.
- **Make sound decisions with reporting and analytics**
  Schedule and deliver timely and relevant project information through email, content repository, file share and printer using over 40 standardised reports or produce customised reports in formats including .pdf, .csv, and .xml.
- **Connected systems that operate together with ease**
  Primavera P6 EPPM simplifies the process of creating custom solutions by taking advantage of its Primavera Gateway, Primavera Web Services and Integration Applications Programming Interface (API).
- **Secure system**
  The powerful security features on Primavera EPPM protects your data from unauthorised changes and only allows users with appropriate permissions to access project related information.
