Oracle Primavera: For any industry

Milestone
Project Management Solutions
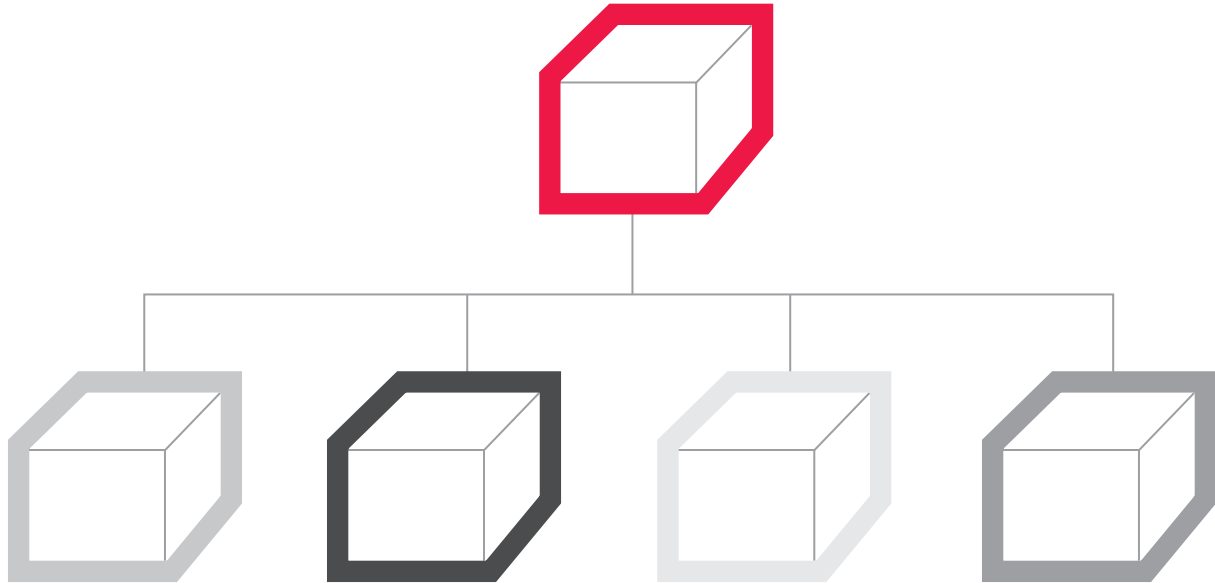

INTRODUCTION

Oracle's powerful Primavera software is suited to all types of project and portfolio management, across a wide range of industries including Engineering, Architecture and Construction; Aerospace and Defence; Utilities; Oil and Gas; Industrial Manufacturing; and Public Sector.

ORACLE®
PRIMAVERA

OVERVIEW

▶ Accurately forecast costs, schedules and resource demands

▶ Adjust the project mix with ease when things change

▶ Align the right people and identify the best team suited to your projects

▶ Meet the needs of various roles, functions and skill levels

▶ Streamline processes and improve efficiencies with Primavera solutions

▶ Increase productivity on project and programme teams with easy to implement and use applications

▶ Collaborate in real-time and securely across different functions

▶ Coordinate project and programme teams effective to support smarter decisions and mitigate risk

▶ Continuously manage fluctuating demand for critical resources and skills

INDUSTRY SECTORS

▶ **Aerospace and Defence**
Remain compliant and competitive by aligning resources, controlling costs, improving programme management practices and managing customer relationships.

– Identify and select the right projects for your business
– Easily view project data that is needed
– Assess project performance
– Control job costs
– Improve decision making
– Maximise resources

▶ **Public Sector**
Meet transparency, accountability and compliance requirements with powerful, scalable and easy to use Primavera software.

– Greater transparency for your constituents
– Increased visibility and control over programmes and projects
– Deliver value against budget requirements
– Demonstrate accountability and regulatory compliance
– Anticipate problems and mitigate risk
– Capture and standardise best practice
– Effectively manage unplanned change and shifting priorities

▶ **Oil and Gas**
Primavera can help you manage projects of all sizes and complexity by integrating with your critical systems to ensure accurate and accessible information across all business areas.

– Identify and select the best exploration and production opportunities
– Invest in and deliver against projects with superior returns
– Effectively maintain and increase the efficiency of existing assets
– Coordinate existing resources and quickly train new talent
– Monitor budget allocations against KPIs
– Build end-to-end solutions that establish best practice across the enterprise

▶ **Engineering, Architecture and Construction**
Improve project performance and client service by successfully planning, managing, controlling and delivering against your projects and programme.

– Deliver projects to time and budget
– Optimise decision making with real-time accurate data
– Access information on the move
– Protect and help prevent against claims
– Track and evaluate subcontractor performance
– Capture and standardise best practice

▶ **Industrial Manufacturing**
Meet market demands with complete project visibility that enables ongoing examination of resources, suppliers and schedules to make sure the project is constantly responding to changing needs.

– Enhance and support strategic decision making
– Monitor programme and portfolio status
– Assess project manufacturing performance
– Schedule projects in real-time
– Develop viable alternatives where necessary

▶ **Utilities**
Selectively plan and execute projects across the enterprise to gain operational efficiencies from power generation projects through to transmission and distribution.

– Deliver projects across generation, transmission and distribution, and new clean-energy ventures
– Successfully execute capital expansion and maintenance projects
– Optimise a diminishing yet highly skilled workforce
– Monitor budget allocations against KPIs
– Improve resource planning and utilisation
– Predict and mitigate against the impacts of weather, competition and government regulation
