

Primavera Prime

INTRODUCTION

Primavera Prime helps organizations complete projects on time and within budget by enabling them to prioritize, plan, manage, and evaluate projects with an integrated, cloud-based solution for managing cost, schedule, scope, risk, resources, and commitments. The Primavera Prime application optimizes and integrates critical processes, scope, schedule, cost data, and documents across the organization. Its Intuitive user interface can be tailored to your business to increase adoption, minimize training, and deliver rapid time to value.

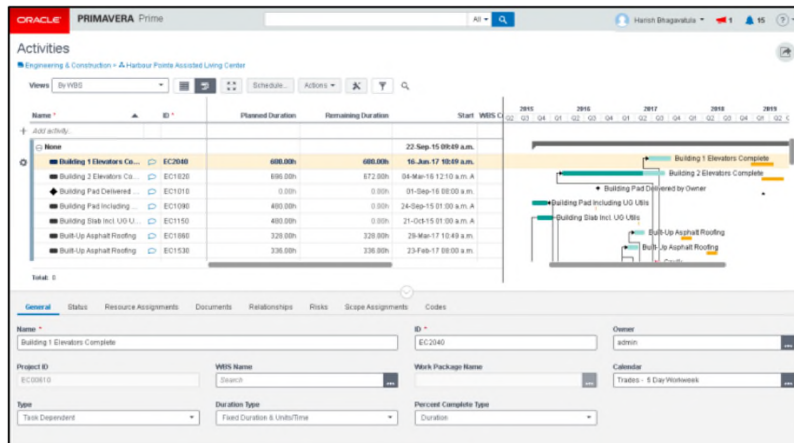

OVERVIEW

Primavera Prime is a cloud-based enterprise solution that allows users to manage all aspects of project management and project pipeline and prioritize projects through portfolio management. Key features include real-time visibility into project cost, schedule, risk, and performance information, which help project managers and stakeholders make the right decisions. Primavera Prime provides tools for portfolio managers to evaluate multiple scenarios and arrive at an optimal plan to allocate financial budgets that are aligned with strategic goals. Cloud-based risk analysis using risk registers and Monte Carlo simulation allow project managers and risk specialists to analyse potential impacts. Enterprise social collaboration features allow project teams to communicate effectively in real time and manage project planning, monitoring, and execution efficiently. Plus, flexible, powerful dashboard and reporting capabilities give stakeholders access to critical information

- ▶ Unite project teams and stakeholders with a host of collaboration and feedback capabilities in the cloud
- ▶ Integrate scope, cost, and schedule solutions under a single platform
- ▶ Integrated project portfolio and capital plan management
- ▶ Mobile application provides users with a rich, targeted user interface and experience
- ▶ Leverage Primavera Prime's easy interface and simple deployment to save time, money, and reduce the risk of change resistance
- ▶ Empower users with more autonomy

- ▶ Context driven, lightweight user interface
- ▶ Global search and navigation to major functional areas
- ▶ Built-in workflows with an option to expand via configuration
- ▶ Web-based interface with no client installation or plug-ins
- ▶ Review and approval of updates to ensure project integrity
- ▶ iPad and iPhone applications support to update project data
- ▶ Flexible dashboards, performance scorecards and reporting solutions
- ▶ Innovative user interface and personalized experience
- ▶ Integrate with Primavera P6 and Unifier to support you through the full Plan, build and Operate lifecycle

FEATURES & BENEFITS

Project Management

Primavera Prime Cloud Service provides project managers with a set of tools to effectively manage simple and complex projects under a single platform. Primavera Prime capabilities allow organizations to manage various aspects of a project and include:

- ▶ **Scope Management:** Allows project manager and schedulers to manage all aspects of project scope including planning, tracking, and status.
- ▶ **Schedule Management:** Web-based solution allows project managers to handle scheduling of a project including work breakdown structure, activities, resource assignment, and scheduling.
- ▶ **Cost Management:** Cloud-based tool allows project managers to manage basic and complex cost management scenarios that interact with various modules of the project to provide a single user interface to manage project cost including forecast information
- ▶ **Resource Management:** Enterprise-level solution allows project managers to utilize company resources effectively by leveraging capabilities such as leveling and resource analysis.
- ▶ **Risk Management:** Cloud-based solution enables project managers and risk specialists to leverage qualitative and quantitative risk analysis, risk registers, and Monte Carlo simulations to analyze and mitigate project risk.
- ▶ **Document Collaboration:** Built-in document management solution allows project team members and personnel to communicate and collaborate effectively via documents.

Portfolio Management

Primavera Prime enables portfolio planners, executives, stakeholders, and project managers to prioritize and select projects collaboratively. The solution provides comprehensive long-range tools for capital planning and budget approval across project portfolios, including:

- ▶ **Portfolio Planning:** Portfolio managers can determine which projects to undertake during a planning cycle. Capabilities such as KPIs, scenarios, scenario comparison, and budget planning allow planners to prioritize and select projects.
- ▶ **Portfolio Prioritization and Project Selection** Primavera Prime displays projects and proposed projects on interactive, editable listing pages with full grouping and sorting capability enabling the portfolio manager to slice and dice project data for evaluation purposes.
- ▶ **Project Execution** Primavera Prime allows customers to capture, baseline and report on portfolio level measures or KPIs throughout the project lifecycle. Typical data that's summarized for use in portfolio monitoring during project execution includes schedule information, project costs, and resource data.
- ▶ **Portfolio Monitoring** Rich portfolio filtering and KPI monitoring via customizable measures formulae allow for ongoing monitoring of portfolio performance. Project portfolios can be monitored by displaying portfolio measures on flexible performance scorecards, either at the project level or as a summary across similar portfolios within a workspace

Primavera Prime Mobile

Primavera Prime provides a mobile application that allows project managers and field users to access portfolio, project, documents, scope, and activity related information both in online and offline mode.
