

ORACLE PRIMAVERA

Scheduled Public Courses Overview

INTRODUCTION	
<p>We are an approved Oracle approved Education Centre and Oracle Education Reseller. All of our Oracle Primavera courses are authorised by Oracle university and delivered to ISO 9001 quality standards. Our training is delivered by Oracle trained Primavera consultants who have extensive planning, project management, implementation and integration experience.</p>	

COURSE 802: PRIMAVERA P6 PROFESSIONAL FUNDAMENTALS (P6 CLIENT)

Enrolling in this course will help you understand P6 Professional's basic features and functionality so you can apply them to your organization's project management processes. You'll also learn how to manage projects on time and within budget to ensure optimal outcomes from capital and resource investments.

- Prerequisites: Knowledge of project management principles
- Audience: Business Analysts, Functional Implementer, Project Manager, End Users
- The course uses P6 Professional, Primavera's Windows-based, client/server application. It is appropriate for those using P6 Professional either as a stand-alone application or as part of P6 EPPM

COURSE 802A: PRIMAVERA P6 PROFESSIONAL ADVANCED (P6 CLIENT)

Understand P6 Professional's advanced resource and project management functionality so you can make improved decisions when managing your projects. You'll learn how to manage resources effectively to maximize investment and use advanced project management techniques to ensure maximum return on investment.

- Prerequisites: Knowledge of project management principles, 802: Primavera P6 Professional Fundamentals
- Audience: Business Analysts, Functional Implementer, Project Manager, End Users
- The course uses P6 Professional, Primavera's Windows-based, client/server application. It is appropriate for those using P6 Professional either as a stand-alone application or as part of P6 EPPM

COURSE 803: APPLICATION ADMINISTRATION IN P6 (P6 WEB)

Understand how to build data structures and configure settings to support implementation or Cloud deployments. It also provides basic information on using Primavera Gateway to configure integrations between P6 and other applications. Learn how to build and manage the EPS and OBS; add users and configure security; set enterprise data and default settings; and support project management processes.

- Prerequisites: Knowledge of project management principles
- Audience: Administrator, Functional Implementer and Project Manager
- This course uses P6, Primavera Web-based project management tool. Oracle BI and BPM are not covered in this course.

COURSE 501: MANAGING RISK IN PRIMAVERA RISK ANALYSIS (PERTMASTER)

Participants will gain a thorough background in the basics of risk management through examples of specific risk modelling techniques. Use risk management to improve your project management, set targets with contingency and set corporate/customer expectations. Learn how to Interpret, communicate and justify a risk analysis

- Prerequisite: Fundamental Product Management knowledge, knowledge of Windows
- Audience: Business Analysts, End Users, Functional Implementer, Project Manager
- The course uses Primavera Risk Analysis (Formally Primavera Pertmaster)
